WHOLE BLOCK FOR NEW ARMOUR PLANT

Armour & Co. announced to-day that they have purchased from the Chanler estate a part of the old John Jacob Astor farm and will erect the largest food distributing branch house in the world on the block bounded by Fourteenth and Fifteenth Streets, Tenth Avenue and North River. The purchase was prompted, the firm said, by the immediate need in Manhattan for increased facilities and to relieve railroad congestion. More than \$2,000,000 is involved.

The block will be covered by a building designed to run freight cars to the second floor from the proposed river front elevated road. This will save unloading products in Jersey City for distribution here.

Work on the structure will be started at once. Until the New York Central's west side plans are approved, it at all, the building will have temporary sidings on the street level.

The site has been in the Astor family a century. The sale was made through Horace S. Ely & Co. Armour & Co. will distribute from the new plant dairy products as well as meats and by-products.

Girls! Try This on Your Hands! Make a Lemon Beauty Cream

Juice of lemons clears, softens and whitens the skin. Prepare a wonderful complexion lotion for a few cents!

"It seems that every girl and woman here is making lemon lotion," says a well-known druggist, and the reason is because at the cost of a small jar of ordinary cold cream they can prepare a full quart of a creamy lemon skin softener and complexion beautifier by squeezing the juice of two fresh lemons into a bottle containing three ounces of cold cream. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman has known for years that lemon juice is used to

bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, smoothen and beautifier.

Try it, girls! Get three ounces of orchard white at any pharmacy or toilet counter and two lemons from the grocer and make up a quart of this fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It should naturally help to whiten, soften, freshen and bring out the roses and beauty of any skin. It is marvelous to smoothen rough, red hands.—Adv.

Pianos and Player-pianos

Announcement Extraordinary on Pianos and Player-pianos

THE United States Government has a War Tax Bill under consideration. This bill is now receiving its final touches by Congress—and in all likelihood will become a law within the next two weeks.

This bill provides as follows: (this is the exact language)

(b) "upon all musical instruments sold by the manufacturer, producer or importer, for more than \$10 each, and upon pianos, players, phonographs, graphophones, talking machines, and records used in connection with any musical instrument, piano-player, graphophone, phonograph or talking machine sold by the manufacturer, producer, or importer, a tax equivalent to 5 per centum of the price for which so sold."

The bill further provides: (in exact language)

"That upon all the articles enumerated in subdivision (B) which are on the day this act is passed held by other than the manufacturer, producer or importer, and intended for sale, there shall be levied, assessed, collected and paid a tax equivalent to 5 per centum of the price for which sold by the manufacturer, producer, or importer. This tax shall be paid by the person, corporation, partnership or association so holding such articles."

This means, in plain language, that all pianos and player-pianos offered for sale will be taxed 5 per cent., whether the instruments are now in our hand or whether they are bought from manufacturers after the bill is passed. It means that pianos and player-pianos will cost US 5 per cent. more than they now cost on account of the tax, and in consequence, must sell for 5 per cent. more.

This is not all.

The bill provides for from 20 to 30 per cent. increased duty on tuning pins, ivory, felts, varnish gums, shellac, rubber and other imported raw materials entering into the manufacture of pianos. Thus the proposed 5 per cent. tax and the increased cost of almost every item entering into piano construction will immediately increase the selling price of pianos and player-pianos from \$50 to over \$100 each, and only those who buy a piano NOW, before the proposed bill becomes a law, can hope to get the advantage of the present low prices, which are, on the whole, the lowest ever known to the American piano industry.
